About The Product

The 706D+ is a multifunctional integrated de-soldering maintenance system combined with reworking station and soldering station. The whole unit is controlled by a single microwave chip that ensures accurate temperature and air flow control. This unit has a heater lamp whose lights blinks on and off when the tip temperature reaches the set temperature.

Product Features

- Single microwave controls the entire unit.
- Heat and air flow adjusting function
- Air pump to ensure effective cooling of heater tube.
- Temperature adjustment
- Soldering iron temperature control knob
- Soldering station temperature display
- Heat gun temperature display

Main engine

Model	706D+
Input voltage	AC 200V ± 10% 50Hz
Power consumption	760W
Temperature display	LED
Noise	< 45dB
Dimensions	150 (L) x 100 (W) x 140 (H) mm
Overall package dimensions	280 (L) x 190 (W) x 170 (H) mm
Weight	1.43Kg

Heat gun

Power consumption	760W
Heater	Metal heater
Temperature range	100 - 450°C
Airflow	120L/min (Max)

Iron holder

Power consumption	60W
Heater	Metal heater
Temperature range	200 - 480°C
